Solid Carbide Tools  
An ISO 9001 Certified Company

## The Leading Edge in Burs

### Far Reaching Industry History...

There are burs and then there are SGS Burs. In order to bring you this exceptional line of rotary files, SGS Tool Company has invested in a new state-of-the-art, automated, climate-controlled manufacturing facility. In this dedicated facility, SGS Tool Company continues to lead the industry in the application of progressive manufacturing techniques and technology for the most widely used burs in the world. With a reputation for quality that has been synonymous with its bur product since 1961, SGS Tool Company equals results.

The world's leading bur manufacturer.
